Data Analysis Services

Get from Data Collection to
Analysis and Reporting, Rapidly

HB

Data Analysis Services for GLP and non-GLP Studies include:

Detection of Hemodynamic Changes

- BP and LVP

Body Temperature and Activity

ECG Evaluation

- Arrhythmia Detection
- Interval Qualification

Heart Rate Variability

EEG Analysis

- Seizure Detection
- Sleep Scoring

Respiration Analysis

DSI™

Get from Data Collection to Analysis and Reporting, Rapidly

Whether you are looking to integrate our data services into all your studies, or simply looking for help to "catch up" with current studies, our team can get you there. Our Data Services team lightens your load by analyzing your data and delivering accurate, consistent, comprehensive reports fast. We work as an extension of your lab, so you do not feel left out of the process.

We offer multiple data analysis options, from either Ponemah or NeuroScore output to full and customizable GLP or non-GLP reports. Our reports range from simple data analysis with software exports to full reports and add-ons. Here are examples of our offerings:

Analysis Offering	Deliverables
Data Analysis	Analyzed data files and Excel Output
Data Analysis + Tables and Graphs	Analyzed data files and Excel Output + Tables and Graphs
Data Analysis and Report (required for GLP)	Analyzed data files and Excel Output + Tables and Graphs, and Customizable Report (with QA audit for GLP)
Add-Ons	Veterinary Cardiologist Review Statistical Analysis

When you work with the Scientific Services team, you'll have the assurance that your study needs can be promptly delivered. Our data analysts have over 30 years of experience, using time-tested standard operating procedures, backed by our internal technical support team and engineers.

Email us at ScientificServices@datasci.com and schedule a complimentary consultation today to learn how our team can accelerate your research.
